

Senior Engineer (Engineer IV) (Norfolk, VA)

Abbott On Call is looking for intelligent, driven, and energetic engineers for open positions in Norfolk, VA.

The position requires at least ten years of experience in the design, operation, maintenance, or testing of watercrafts, to include working experience with United States Coast Guard (USCG), American Boat and Yacht Council (ABYC), American Bureau of Shipping (ABS), and Department of Defense (DoD) standards for watercraft.

Experience working with materials (i.e., steel, aluminum, Fiber Reinforced Plastic (FRP) and wood) is highly preferred.

All candidates must demonstrate three years of supervisory experience.

Applicants must have a bachelor's degree in Naval Architecture or an Engineering discipline from an accredited college or university.

Abbott On Call Systems Engineering firm is a leader in engineering, modular ship design, development, test and validation, and interface verification and validation.
